EDUCATION

University of Cincinnati	Class of 2026
Masters of Engineering in Computer Science	GPA: 3.7
University of Cincinnati	Class of 2023
Bachelor of Science in Computer Science	GPA: 3.2

SKILLS

Technology: C#, Python, Selenium, Google Firebase, Snowflake, JavaScript, MySQL, Linux, PostMan, Docker, Jira
Spoken Languages: Chinese, English

EXPERIENCE

UrbanHikers Cincinnati, Software Developer	2025 March- Currently
- Assisted in Engineering a modern, responsive user interface using React, TypeScript, Built interactive components and dynamic pages for booking walking routes, route discovery, and user profiles - Engineered a Firebase-powered backend infrastructure, utilizing Firestore for real-time data handling, Authentication for secure user identity management and booking information - Performed E2E/Blackbox testing on application functionality from an end-user perspective and PostMan for backend endpoints, authentication processes, and data integrity API testing for backend endpoints, authentication processes, and data integrity	
Divisional Maintenance Group, Quality Assurance Intern	2022 January - April
- Engineered end-to-end test coverage for the DMG Moneyball App's front-end (React) and back-end services, leveraging Selenium-based automation and API validation via Postman to ensure data consistency - Conducted API testing using Postman, documented test plans and bugs through Jira - Executed comprehensive QA strategy including smoke, regression, and integration tests for the DMG MoneyBall App, contributing to a 23% reduction in production bugs	
Cincinnati Insurance Co, IT data entry Intern	2021 January - May
- Responsible for the testing of Third-Party policy data that are bridged to CIC's own software by manually creating policy numbers and ensuring data integrity - Tested Company new software ThirtyFour that allows the user to select a variety of policy steps to create policy numbers automatically by utilizing JSON	
University of Cincinnati, Department of EECS, Student Worker	2020 June - September
- Worked for the the Department of EECS and several professors, Assembled class files and notes for classes, drew circuit diagrams and formatted equations - Analyzed data for research program regarding mRNA by utilizing Matlab	

GROUP PROJECTS

Capstone Project – VR Sandbox Game (Unity)	2023
- Participated in designing and implementation the front-end user interface for a VR sandbox game built in Unity, enabling users to switch environments, start/end sessions, and interact with core game controls - Developed the Front End panel and features including switching between maps, starting and ending games	
Created an encryption based upon playfair during the UC Hackathon	2020
Created a software in Python that utilized the principle of playfair by prompting the user to enter a key to encrypt the plaintext the user enters	

VOLUNTEER & MEMBERSHIP

IEEE, Member	2020 – Present
Attend tech talks on Computer Vision, Web Development, and Computer Systems
